Collection containers for cups

Plastic and cardboard cups can now be collected and recycled easily thanks to the collection containers designed for this purpose. You throw the used cups into the openings provided and, with minimum space requirements, they are collected for recycling. In the 'CLC' models, you can pour your residual liquid into the central reservoir.

UV-resistant barrels, suitable for indoor and outdoor use. The base is developed in recycled materials.

Waste bins for indoor & outdoor use

These sturdy, functional waste bins with hinged lid are easy to put anywhere. These bins are suitable for both indoor and outdoor use thanks to the UV-resistant treatment. Compact and space-saving waste sorting is no problem with this type of litter bin. Both models - with different capacities - are stackable with each other.

Composting organic waste?
Discover our compost barrels on page 112.

Cylindrical waste bins for indoor & outdoor use

Cylindrical waste drums are known as heavy duty containers that are extremely suitable for intensive use. You can use the barrels for both indoor and outdoor use. The optional bases help to move the containers. The built-in handles ensure that the barrels do not get stuck together when nested empty.

Compost bin

Composting small quantities of organic waste in a very limited area? A compost bin allows you to do so without the material drying out or smelling bad. You can easily remove the compost from the compost bin thanks to its conical shape. Lift the mantle and the compost can be removed. The hinged lid can be opened with one hand, and can be left open. The perforated bottom plate ensures optimal air intake through air tunnels and the aeration stick ensures that the air also reaches the middle of the biomass.

Waste containers outdoor use

The functional and high-quality waste containers for outdoor use integrate seamlessly into their surroundings. Manufactured from robust materials, they are UV-treated to withstand various weather conditions. The containers are equipped with castors for practical repositioning. The waste containers conform to the most common collection systems in Europe.
